

A skier in a bright yellow jacket is captured mid-air, jumping over a snow-covered ridge. The skier is wearing dark pants and is holding ski poles. The background is a clear, vibrant blue sky. The snow on the ridge is textured and appears to be made of large, soft clumps.

ELB 400 - Updated Sets

Press release

Since March 2009, Elinchrom has provided the most portable, versatile and powerful battery flash system, the Elinchrom Quadra. Today, the latest ELB 400 sets are more complete than ever with the newly introduced EL-Skyport Transmitter Plus and the ProTec Location bag.

Compared to the original Quadra, the ELB 400 offers more than twice the flash capacity with only two thirds of the weight and substantially improved functionality for inspiring ease of use.

The ELB 400 Hi-Sync set is for photographers who need Hi-Sync photography using high shutter speeds to overpower the sun, with a minimum of banding. The Hi-Sync set comes with the recently introduced Quadra HS head. However, no transmitter is included so that photographers have the freedom to choose the corresponding EL-Skyport Transmitter Plus HS for their camera system.

The ELB 400 Pro and Dual Pro sets are designed for photographers who prefer the most versatile flash head. The Quadra Pro Head offers good flash durations and can also be used – to some extent – for Hi-Sync with the optional EL-Skyport Transmitter Plus HS. These sets include the new Skyport Transmitter Plus, a long range trigger that can adjust the power remotely.

The ELB 400 Action set is for photographers for who want fast flash durations to create the sharpest images using normal flash sync speeds. This set also includes the new Skyport Transmitter Plus for seamless and reliable control.

All ELB 400 sets now include the 18-cm Quadra grid reflector which offers almost one stop more light and the newly developed Location bag, which is adaptable to every photographer's needs.

Elinchrom is renowned for the quality of its lights, the portability of its products, and its wide range of accessories. Elinchrom's product range provides exceptional value allowing every photographer to enjoy their flash photography.

Wherever you are, outside, on the move or in a studio, the new ELB 400 sets are your portable, robust, lightweight and easy solution that empowers you with endless possibilities.
